

Spin Factors:

1.)The new name for UFOs is UAPs or "unidentified aerial phenomena". This shift from "objects" to

"phenomena" is rooted in the occult notion that "Thought" proceeds "Manifestation." Thought or

Beam Ships (Billy Meier term) exist in the dimension beyond space-time. All human reality is

dependent upon that level of consciousness. Our Space-time reality is a manifestation of that

dimension beyond space-time.

a.)Quantum physicists have discovered this "new dimension" is very useful for predicting the behavior

of elements within our space-time dimension. This complex plane of dark energy/matter appears to

be the source of our physical world. They are beginning to understand that consciousness is causal,

and our physical reality is its manifestation.

b.)"Dark energy" or "dark matter" is the science of energies which lie behind the process of evolution.

The source of things in our existence is in this new dimension beyond our space-time reality.

c.)Current empirical evidence alone will not help these quantum physicists understand the ETs

and their "thought ships". Also, a new epistemological understanding will be needed too.

2.) The military-industrial complex term "extraterrestrial" has been replaced with the term *"potential*

national security threat". This is the last defensive position for the fossil fuel and nuclear industries.

Their control over the worn out economic and political systems of the past, as the primary control

apparatus, is ending.

a.)Those who seek to control earth's civilization, can for a time fight a holding action against the forces

of global warming. But in the face of extinction they will be forced to yield.

b.)The evolution and persistence of systems in nature is rooted in cooperation rather than competition.

This notion will soon seep into the world's political process. Cooperation is the only solution to extinction.

Statement

In Maitreya's 2004 article entitled, "The Path to the Sun", he states clearly: "Much is known by many governmental agencies and withheld from the public. Above all, the *harmless* of the UFO, even when known, is never affirmed. On the contrary, everything concerning them; while wrapped in vague mystery, is presented as threat. People in positions of power and control know that if their people knew the true nature of the UFO phenomenon, and understood them to be envoys from civilizations far ahead of ours, they would no longer accept, passive and mute, the conditions of life on earth. They would demand that their leaders invite these aerial guests to land openly, and teach us how to live and achieve in the same fashion. The time is not far off when this will be the case."

My Conclusion

UFOs reside at a higher level of consciousness and that range of vibration or frequencies are beyond our level of perception and understanding. Hence, when the average human; due to past life karma, or current soul sanctioned necessity, comes into contact with these higher level beings things inevitably look unintelligible or evil. And without proper training and correct understanding common folks will mock or oppose the experience, and try to bring it down by distorting it. Understanding life means consciousness. It is about the "idea" behind and in back of the manifestation. The dimension beyond our space-time dimension is made of pure thought energy. Our future is dependent upon this new emerging paradigm.
